

SIRTA

Substitution of the impaired renal function by autonomous techniques

Suppléance à l'Insuffisance Rénale par des Techniques Autonomes

- ▶ Company SIRTA gathers health care institutions intended for the treatment by dialysis of the impaired renal function. Company SIRTA has two centers, Herblay and Argenteuil and also works in collaboration with the Parisian Northern private hospital.

- ▶ The centers are open all the year. They deal with patients of the area but accommodate also people on holiday in the area of Paris.
- ▶ Concerned from the quality of the managed treatments, company SIRTA has a conformity reference to the level of the accreditation. The computerization of the medical file and the technology implemented ensure an optimal follow-up of the patient. Doctors will deal with the patients in order to determine, in a collegial way, a strategy of care adapted to its pathology.
- ▶ We will endeavor to help you in your administrative approaches.

If you don't have an insurance health in France, please provide:

- ↳ Certificate of assumption of responsibility (form E111 or E112), if you are citizen of other countries of the CEE
- ↳ If you are citizen of a country outside the CEE, and without convention, an invoice will be addressed to you at the end of your stay.

- ▶ Rooms of treatment, in a contemporary and functional architecture, are entirely air-conditioned and equipped with television stations.
